

Procurement Support

Keel can help you with optimizing the procurement cycle and all spectrum of logistics management. Having extensive experience, we have created a **database** which helps us support section / team leads with more accurate data and **predict equipment maintenance** periods based on the data received from the same equipment models.

Keel CMMS support and digitization provides, but is not limited to:

- **Budget** overview;
- **Equipment** current location;
- **Inventory** leftovers;
- **Maintenance** corrections.

7 Benefits of Digitizing Purchase Requisition:

- Fraud prevention;
- Money saving;
- Equipment downtime elimination;
- Real-time equipment status;
- Budget planning;
- Easy purchase order generation;
- Easy regulatory adjustments;
- Available list of spare parts.

>> WE TAKE CARE OF:

Digitalization of Equipment and Inventory Data

- Structure;
- Location;
- Quantity;
- Type.

Lead time estimation for equipment delivery during:

- Overhaul;
- Certification;
- Refurbishment;
- Intercompany sales.

Logistics arrangements

- Communication with; buyers and suppliers;
- Deadlines monitoring.

Work orders management

- Creation;
- Prioritizing;
- Disabling / enabling WOs for relevant EQ.

>> RESULTS

Warehouse monitoring

Up-to-date overview of the available spare parts.

Consumed parts reflection

Immediate overview of the consumed parts according to the service reports.

Efficient work orders

Timely update of work orders according to the equipment status.

Uninterrupted performance

Error-free logistics and timely delivery.

As a result, you have more time for the actual execution since the up-to-date digital data is reliable and all the logistics and communication duties are done for you.

You can be fully involved in the tasks that require your physical presence:

- Negotiations;
- Meetings;
- Surveys;
- Executions;
- FATs (Factory Acceptance Test);
- Coordination of the rig crew.
